**Department of
Electronics and Communication Engineering**

CERTIFICATE

This is to certify that the project entitled “ **RESTAURANT MENU ORDERING SYSTEM USING ZIGBEE TECHNOLOGY** ” is a bonafide work done and submitted by

K. ROHITH

20D31A0416

In partial fulfillment of the requirement for the degree of B.TECH in the Department of **ELECTRONICS AND COMMUNICATION ENGINEERING** from **INDUR INSTITUTE OF ENGINEERING & TECHNOLOGY**, SIDDIPET (Affiliated to JNTU Hyderabad) during the academic year 2023-2024 is a record of bonafide work carried out under the supervision of **Mr. K. RAMA RAO** Associate Professor.

Project Supervisor
Mr. K. RAMA RAO
Associate Professor

Head of ECE Department
Dr. G. MALLESHAM
Professor

External Examiner

DECLARATION

I hereby declared that the work reported in the present project entitled **“RESTAURANT MENU ORDERING SYSTEM USING ZIGBEE TECHNOLOGY”** is a record of work done by me under the supervision of **Mr. K. RAMA RAO Associate Professor**, Department of Electronics and Communication Engineering, Indur Institute of Engineering and Technology, Siddipet.

No part of this is copied from books/journals/internet and wherever the portion has been taken the same has been duly referred in the text. The reports are based on the project work done entirely by me and not copied from any other.

ACKNOWLEDGEMENT

The satisfaction that accompanies the successful completion of any task would be incomplete without the mention of the people who made it possible and whose encouragement and supervision has been a source of inspiration throughout the course of the project.

It is my privilege and pleasure to express my profound sense of gratitude and indebtedness to my project supervisor **Mr. K. RAMA RAO, Associate Professor** of Electronics and Communication Engineering Department, Indur Institute of Engineering & Technology, for their supervision, cogent discussion, constructive criticisms and encouragement throughout this dissertation work.

I take the opportunity to offer me humble thanks to **Dr. G. MALLESHAM, Professor & Head of the Department**, Electronics and Communication Engineering, Indur Institute of Engineering & Technology, for his encouragement and constant help.

I also thank **Dr. V. P. RAJU, Principal**, Indur Institute of Engineering & Technology, for his support in this Endeavour.

In addition, I would like to thank all the **faculty members & Lab Staff** Department of Electronics and Communication Engineering, **Management**, who provided me with good lab facilities and helped me in carrying out the project successfully.

I finally thank my family members and friends for giving moral strength and support to complete this dissertation.

ABSTRACT

The project is proposed with the Zigbee innovation as the correspondence medium which carries out quicker requesting framework. The innovation ready to tackle need number of specialist, decreases the blunder on requesting food sources by the clients. The e-menu food requesting framework depends on programming equipment foundation of Arduino (ATMega328p) and utilizing Zigbee short reach radio correspondence innovations. We have partitioned the framework in two segments one is handheld area (client segment) and other is principle segment (proprietor segment), both segment comprises of Zigbee handsets. The framework additionally having a touch screen and graphical LCD interface for giving a more intelligent UI menu ordering. The paper depicts about the calculation utilized in execution of cutting edge menu requesting framework by with a remote correspondence innovation Zigbee and the means associated with its convention stack. The proposed framework is planned to use by a wide range of eateries for all classes of individuals. At handheld area GLCD with contact screen is given to put in the request and request sends further to principle segment by means of Zigbee handset. At the same time ringer will show that request has shown up and LCD show which is at primary area is utilized to show food menu request and cost.

KEY WORDS: ZIGBEE, e-menu, Arduino, ATmega328p, Graphical LCD.
